

Atlas Tube produces the broadest range of steel hollow structural sections (HHS) in North America. Founded in 1984 by Harry Zekelman, we've grown his legacy through dedication to customer service, lean manufacturing, employee empowerment and leading-edge technology.

Atlas is a division of Zekelman Industries, the largest independent steel pipe and tube manufacturer in North America and a leader in modular construction innovations. In addition to our range of structural steel tubing, Atlas has the shortest cycle times in the industry and answers to design and shipment questions.

Atlas advocates for domestic manufacturing and fair trade. **We support:**

A campaign calling on business leaders across all sectors to buy local and partner with domestic organizations.

A national grass-roots initiative supporting the domestic steel industry and all the hard workers whose livelihoods depend on it.
